TESTIMONIAL

"In 2022, we welcomed our first child. Just before her birth, I was laid off due to COVID, and my husband's small business was working hard just to stay afloat. As a new mother, I reconsidered my career path and decided to start my own company, one that would allow me to support my family while being present for my daughter.

Building a business from scratch was challenging, especially financially. As my company grew, I realized my daughter needed more social interaction, and I needed more focused work time. When we first visited the YMCA, we were met with warmth and kindness. I enrolled my daughter in swim lessons and learned about the scholarship program. We were approved for a partial scholarship, giving our family a place to focus on health, growth, and connection.

Since then, the YMCA has become a meaningful part of our lives. Our daughter has enjoyed gymnastics, swim, ballet, basketball, and soccer, growing into a confident and curious little girl. Being accepted into the YMCA preschool program has been a tremendous blessing, saving us time, money, and stress.

The YMCA scholarship has done more than ease our financial burden, it has enriched our family's life. It has strengthened our health and nurtured our daughter's development within a supportive community. We are deeply grateful and hope to one day give back to help other families."

With heartfelt thanks, Nichole P. and Family

STORY OF IMPACT

As a retired USMC Officer, when my Oncologist suggested I sign up for this program I was initially reluctant. I thought if I simply went to the gym on my own I could figure it out. After a lengthy discussion I agreed to give it a try. I am very pleased that I did. During the 12-week program I learned techniques that helped me with core strength and improvement for my balance.

The program helped me get into a systematic regime which was easy to learn and got me moving. I quickly learned that I could measure my improvement in all the activities I adopted. I give full credit to my Oncologist for recommending the program and to the YMCA for having such an activity available and most importantly to the instructors assigned to our group. These instructors are very well trained and showed patience and compassion to each participant whose needs varied dramatically. They are the best.

The program is over for me, but one of my classmates and I have decided to continue our three day a week routine to build on what we have accomplished. This is a tremendous gift From the "Y" that I would recommend to any Cancer patient.
